PROFESSIONAL SUMMARY

A Computer Science student at V.S.B Engineering College specializing in Artificial Intelligence, Software Engineering, and Full stack Development. Experienced in building end-to-end NLP systems and web platforms. Proficient in leveraging data structures and object-oriented programming to build modular, clean, and highly functional code.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, HTML/CSS, Python, SQL (MySQL)
- **Frameworks:** Python (Flask), React.js
- **Tools & Platforms:** Figma, Google Analytics, GitHub, VS Code, Vercel, Render, ChatGPT API, Google Gemini, Claude

EXPERIENCE & OPEN-SOURCE CONTRIBUTIONS

Full-Stack Developer Intern | Mindenious Edu Tech (Remote) May 2026 – June 2026

- Learned and implemented concepts of Frontend principles enhanced the web experience made site functional.
- Experienced with the Backend development and connected it securely with Frontend.
- Developed a neat, visually appealing and functional portfolio got to learn the tools code sandbox.

GSSoC'26 Contributor | Open-Source Contributor (Remote) May 2026 – Oct 2026

- Actively contributed to open-source software repositories during the GirlScript Summer of Code 2026 program.
- Enhanced features and resolved bugs in diverse web applications built with React.js and Next.js frameworks.
- Collaborated with project maintainers globally to review code submissions and maintain version control integrity.

Artificial Intelligence Intern | Infosys Springboard (Remote) Aug 2025 – Oct 2025

- Developed a Customer Review Insight System to parse large-scale user feedback and extract product performance metrics.
- Implemented Natural Language Processing (NLP) models to classify customer sentiment and isolate top feature requests.
- Built web dashboards leveraging Python data visualization toolkits to present key findings for executive-level review.

KEY PROJECTS

- **Customer Review Insight System** | Python, NLP, Pandas, Flask
Engineered an NLP pipeline with NLTK to evaluate user sentiment data, producing clear data frameworks for product diagnostics.
- **Animeverse Gaming Platform** | HTML, CSS, JavaScript, Web Deployment
Designed and launched a client-side gaming application hub focused on cross-platform layout fluidness and asset loading optimizations.
- **Technical Journal Blog Application** | Next.js, MDX, Vercel
Built a high-performance rendering blog site powered by Next.js and MDX file structures for lightweight publishing on modern web infrastructure.
- **Student Help Desk Tool** | Next.js, RAG, Render
Built a Full-Stack RAG Application which acts as 24/7 assistant to College and University Students, Deployed and can be used in public.

EDUCATION

Higher Secondary School Certificate Score: 80% Hyderabad, TG
Bhavans Sri Aurobindo Junior College

B.E Computer Science and Engineering CGPA: 7.37 Karur, TN
V.S.B Engineering College

CERTIFICATIONS

- Principles of Generative AI Certification – Infosys Springboard (2025)
- Java Programming Certification – National Programme on Technology Enhanced Learning (NPTEL)
- Java Foundation Certificate – Infosys Springboard
- Full-Stack Development Certificate (Mindeneous Edu Tech)
- Become an AI AgentBaazar Champion - Salesforce
